

## Amplify API Documentation

Bearer Token Auth Required: Bearer amp-token

Base\_URL: <https://prod-api.vanderbilt.ai>

### Endpoint: {Base\_URL}/chat (POST)

Offers real-time chat capabilities exclusively through streaming. Interact with a selection of the most advanced AI chat models available, including GPT, Claude, and Mistral.

Expected Data	Responses
<p><b>model</b> (string): Required. Options include:</p> <ul style="list-style-type: none"><li>- gpt-35-turbo, gpt-4o, gpt-4o-mini,</li><li>- gpt-4-1106-Preview</li><li>- anthropic.claude-3-haiku-20240307-v1:0</li><li>- anthropic.claude-3-5-sonnet-20240620-v1:0</li><li>- anthropic.claude-3-opus-20240229-v1:0</li><li>- mistral.mistral-7b-instruct-v0:2</li><li>- mistral.mixtral-8x7b-instruct-v0:1</li><li>- mistral.mistral-large-2402-v1:0</li></ul> <p><b>temperature</b> (number) <b>max_tokens</b> (integer) <b>dataSources</b> (array of objects)</p> <ul style="list-style-type: none"><li>- <b>id</b> (string): Required.</li><li>- <b>type</b> (string): Required.</li></ul> <p><b>messages</b> (array of objects):</p> <ul style="list-style-type: none"><li>- <b>role</b> (string): Required. Options include:</li><li>- system</li><li>- assistant</li><li>- user.</li><li>- <b>content</b> (string): Required.</li></ul> <p><b>type</b> (string): Options include prompt. <b>options</b> (object):</p> <ul style="list-style-type: none"><li>- <b>dataSourceOptions</b> (object)</li><li>- <b>ragOnly</b> (boolean)</li><li>- <b>skipRag</b> (boolean)</li><li>- <b>assistantId</b> (string)</li><li>- <b>model</b> (object):<ul style="list-style-type: none"><li>- <b>id</b> (string)</li></ul></li><li>- <b>prompt</b> (string)</li></ul>	<p><b>200:</b> Chat stream response. Content: application/json <b>success</b> (boolean) <b>message</b> (string) <b>data</b> (string) <b>400:</b> Bad request, invalid or missing fields. <b>401:</b> Unauthorized, invalid authentication credentials. <b>403:</b> Forbidden, request refused. <b>404:</b> Not found, resource not found.</p>
Example Body	Example Response

<pre> {   "data": {     "model": "gpt-4o",     "temperature": 0.7,     "max_tokens": 150,     "dataSources": [{       "id": "s3://user@vanderbilt.edu/l80.json",       "type": "application/pdf"     }],     "messages": [       {         "role": "user",         "content": "What is the capital of France?"       }     ],     "options": {       "ragOnly": false,       "skipRag": true,       "model": ["gpt-4o"],       "prompt": "What is the capital of France?",       "assistantId": "astp/abcdefghi"     }   } } </pre>	<pre> {   "success": true,   "message": "Chat completed successfully",   "data": "The capital of France is Paris." } </pre>
---	---

### Endpoint: {Base\_URL}/state/share (GET)

View a list of shared resources, including assistants, conversations, and organizational folders, distributed by other Amplify platform users

Expected Data	Responses
N/A	<b>200:</b> List of shared data records. Content: application/json <b>sharedBy</b> (string) <b>note</b> (string) <b>sharedAt</b> (string, date-time) <b>key</b> (string)
Example Body	Example Response
N/A	<pre> [ {   "note": "testing share wit a doc ",   "sharedAt": 1720714099836,   "key": "yourEmail@vanderbilt.edu/sharedByEmail@vanderbilt.edu/9328 </pre>

	04035837948202934805-24382.json", "sharedBy": "sharedByEmail@vanderbilt.edu" }],
--	--

### Endpoint: {Base\_URL}/state/share/load (POST)

Once the shared data is accessed, individual elements can be retrieved and examined using a unique identifier key associated with each entry in the shared resource list.

Expected Data	Responses
<b>key</b> (string): Required.	<b>200:</b> Shared data loaded successfully. Content: application/json <exportSchema> <b>401:</b> User does not have access to the share functionality. <b>404:</b> Data not found.
Example Body	Example Response
<pre>{   "data": {     "key": "yourEmail@vanderbilt.edu/sharedByEmail@vanderbilt.edu/9324805-24382.json"   } }</pre>	<pre>{   "version": 1,   "prompts": [     {       "id": "ast/7b32fc3f-fe93-4026-b358-0e286e4a6013",       "name": "share item 1",       "content": "&lt;content&gt;",       "data": {         "assistant": {           "definition": {             "instructions": "&lt;instructions&gt;",             "user": "sampleUser@vanderbilt.edu",             "dataSources": [{"name": "file_name.csv"}],             "name": "share item i           }         },         "provider": "amplify",         "noCopy": true,         "noEdit": true,         "noDelete": true,         "noShare": true       }     }   ] }</pre> <p>...&lt;More Data&gt;...</p>

### Endpoint: {Base\_URL} /files/upload (POST)

Initiate a file upload to the Amplify platform, enabling interaction via prompts and assistants. The endpoint generates and returns a time-limited, pre-authenticated URL, facilitating secure transmission of file contents.

Expected Data	Responses
<b>name</b> (string): Required. Options include: <ul style="list-style-type: none"><li>- saveAsData</li><li>- createChunks</li><li>- ingestRag</li><li>- makeDownloadable</li><li>- extractText</li></ul> <b>params</b> (object) <b>type</b> (string): Required. <b>name</b> (string): Required. <b>knowledgeBase</b> (string): Required. <b>tags</b> (array of strings): Required. <b>data</b> (object): Required.	<b>200:</b> File upload process initiated or completed successfully. Content: application/json <b>success</b> (boolean) <b>uploadUrl</b> (string, nullable) <b>statusUrl</b> (string, nullable) <b>contentUrl</b> (string, nullable) <b>metadataUrl</b> (string, nullable) <b>key</b> (string, nullable) <b>400:</b> Bad request, incorrect or missing parameters. <b>401:</b> User does not have access to the file upload functionality.
Example Body	Example Response
<pre>{   "data": {     "type": "application/fileExtension",     "name": "fileName.pdf",     "knowledgeBase": "default",     "tags": [],     "data": {}   } }</pre>	<pre>{   "success": true,   "uploadUrl": "&lt;uploadUrl&gt;",   "statusUrl": "&lt;statusUrl&gt;",   "contentUrl": "&lt;contentUrl&gt;",   "metadataUrl": "&lt;metadataUrl&gt;",   "key":     "yourEmail@vanderbilt.edu/date/293088.json" }</pre>

## Endpoint: {Base\_URL} /files/query (POST)

View a list of uploaded Amplify data sources.

Expected Data	Responses
<p><b>startDate</b> (string, date-time): Default is 2021-01-01T00:00:00Z.</p> <p><b>pageSize</b> (integer): Default is 10.</p> <p><b>pageKey</b> (object):</p> <ul style="list-style-type: none"><li>- <b>id</b> (string)</li><li>- <b>createdAt</b> (string)</li><li>- <b>type</b> (string)</li></ul> <p><b>namePrefix</b> (string or null)</p> <p><b>createdAtPrefix</b> (string or null)</p> <p><b>typePrefix</b> (string or null)</p> <p><b>types</b> (array of strings): Default is an empty array.</p> <p><b>tags</b> (array of strings): Default is an empty array.</p> <p><b>pageIndex</b> (integer): Default is 0.</p> <p><b>forwardScan</b> (boolean): Default is false.</p> <p><b>sortIndex</b> (string): Default is createdAt.</p>	<p><b>200:</b> Returns a list of files that match the query criteria. Content: application/json</p> <p><b>success</b> (boolean)</p> <p><b>data</b> (object)</p> <p><b>items</b> (array of objects)</p> <p><b>pageKey</b> (object): Key to retrieve the next page of results</p>
Example Body	Example Response
<pre>{   "data": {     "pageSize": 2,     "sortIndex": "",     "forwardScan": false   } }</pre>	<pre>{   "success": true,   "data": {     "items": [       {         "createdAt": "2024-07-15T17:12:45.046682",         "updatedBy": "yourEmail@vanderbilt.edu",         "createdBy": "yourEmail@vanderbilt.edu",         "name": "fileName.doc",         "knowledgeBase": "default",         "data": {},         "updatedAt": "2024-07-15T17:12:45.046700",         "totalTokens": 12644,         "dochash": "25ef6a3e472d8dbe501915c1",         "id": </pre>

	<pre>"yourEmail@vanderbilt.edu/date/2389020943.json",   "tags": [],   "totalItems": 1025,   "type": "application/fileExtension" } ] }</pre>
--	---

### Endpoint: {Base\_URL}/files/tags/list (POST)

View a list of your Amplify tags that can be tied to your data sources, conversations, and assistants.

Expected Data	Responses
N/A	<b>200:</b> A list of tags. Content: application/json <b>success</b> (boolean) <b>data</b> (object) <b>tags</b> (array of strings)
Example Body	Example Response
<pre>{   "data": {} }</pre>	<pre>{   "success": true,   "data": {     "tags": [       "NewTag"     ]   } }</pre>

### Endpoint: {Base\_URL}/files /tags/create (POST)

Create new Amplify tags that can be tied to your data sources, conversations, and assistants.

Expected Data	Responses
<b>tags</b> (array of strings): Default is an empty array.	<b>200:</b> Result of tag creation. Content: application/json <b>success</b> (boolean) <b>message</b> (string)
Example Body	Example Response
<pre>{   "data": {     "tags": ["NewTag"]   } }</pre>	<pre>{   "success": true,   "message": "Tags added successfully" }</pre>

### Endpoint: {Base\_URL}/files/tags/delete (POST)

Delete an Amplify tag.

Expected Data	Responses
<b>tag</b> (string): Required.	<b>200:</b> Result of tag deletion. Content: application/json <b>success</b> (boolean) <b>message</b> (string)
Example Body	Example Response
<pre>{   "data": {     "tag": "NewTag"   } }</pre>	<pre>{   "success": true,   "message": "Tag deleted successfully" }</pre>

### Endpoint: {Base\_URL}/files/set\_tags (POST)

Associate an Amplify tag with a specific data source, conversation, or assistant.

Expected Data	Responses
<b>id</b> (string): Required. <b>tags</b> (array of strings): Default is an empty array.	<b>200:</b> Result of setting file tags. Content: application/json <b>success</b> (boolean) <b>message</b> (string)
Example Body	Example Response
<pre>{   "data": {     "id":     "yourEmail@vanderbilt.edu/date/290208.json",     "tags": ["NewTag"]   } }</pre>	<pre>{   "success": true,   "message": "Tags updated and added to user" }</pre>

### Endpoint: {Base\_URL}/embedding-dual-retrieval (POST)

Retrieve Amplify data source embeddings based on user input through dual retrieval method.

Expected Data	Responses
<b>userInput</b> (string): Required. <b>dataSources</b> (array of strings): Required. - id (string): global key <b>limit</b> (integer)	<b>200:</b> A list of documents related to the user input. Content: application/json <b>result</b> (array)

Example Body	Example Response
<pre>{   "data" : {     "userInput": "Can you describe the policies outlined in the document?",     "dataSources": ["global/09342589234890.content.json"],     "limit": 10   } }</pre>	<pre>{   "rH12result": [     {       "content": "xmlns:w=3D'urn:schemas-microsoft- com:office:word' ...",       "file": "global/24059380341.content.json",       "line_numbers": [15-30],       "score": 0.7489801645278931     },     {       "content": "Date: Wed, 8 May 2024 17:45:21 +0000 (UTC) ...",       "file": "global/0934498492349.content.json",       "line_numbers": [1-11],       "score": 0.7464098930358887     },   ], }</pre>

### Endpoint: {Base\_URL}/assistant/list (GET)

Retrieve a list of all Amplify assistants.

Expected Data	Responses
N/A	<b>200:</b> List of assistants retrieved successfully. Content: application/json <b>success</b> (boolean) <b>message</b> (string) <b>data</b> (array)
Example Body	Example Response
N/A	<pre>{   "success": true,   "message": "Assistants retrieved successfully",   "data": [     {       "assistantId": "astp/498370528-38594",       "version": 3,       "instructions": "&lt;instructions&gt;",       "disclaimerHash": "348529340098580234959824580-pueiorupo4",       "coreHash": "eiouqent84832n8989pdeer",       "user": "yourEmail@vanderbilt.edu",       "uri": null,     }   ] }</pre>

	<pre>"createdAt": "2024-07-15T19:07:57", "dataSources": [   {     "metadata": "&lt;metadata&gt;",     "data": "",     "name": "api_documentation.yml",     "raw": "",     "id": "global/7834905723785897982345088927.content.j son",     "type": "application/x-yaml", ...&lt;More Data&gt;...</pre>
--	--

**Endpoint: {Base\_URL}/assistant/share (POST)**

Share an Amplify assistant with other Amplify users.

Expected Data	Responses
<p><b>assistantId</b> (string): Required.</p> <p><b>recipientUsers</b> (array of strings): Required.</p> <p><b>note</b> (string)</p>	<p><b>200:</b> Assistant sharing response.</p> <p>Content: application/json</p> <p>success (boolean)</p> <p>message (string)</p>
Example Body	Example Response
<pre>{   "data": {     "assistantId": "ast/8934572093982034020-9",     "recipientUsers": ["yourEmail@vanderbilt.edu"],     "note": "check this out!"   } }</pre>	<pre>{   "success": false,   "message": "Unable to share with some users",   "failedShares": [     "yourEmail@vanderbilt.edu"   ] }</pre>

### Endpoint: {Base\_URL}/assistant/create (POST)

Create or update a customizable Amplify assistant.

Expected Data	Responses
<p><b>name</b> (string): Required.</p> <p><b>description</b> (string): Required.</p> <p><b>assistantId</b> (string):     Needed if updating an existing assistant.     We will provide you with one if creating a new assistant</p> <p><b>tags</b> (array of strings): Required.</p> <p><b>instructions</b> (string): Required.</p> <p><b>disclaimer</b> (string)</p> <p><b>uri</b> (string or null)</p> <p><b>dataSources</b> (array of objects): Required.</p> <ul style="list-style-type: none"><li>- Entire Data Source object</li></ul> <p><b>dataSourceOptions</b> (array of objects):</p> <ul style="list-style-type: none"><li>- <b>insertAttachedDocumentsMetadata</b> (boolean)     Includes Attached Data Source Metadata in Prompt</li><li>- <b>insertAttachedDocuments</b> (boolean)     Includes Attached Documents in Prompt</li><li>- <b>insertConversationDocuments</b> (boolean)     Includes Conversation Documents in Prompt</li><li>- <b>disableDataSources</b> (boolean)     Disable Data Source Insertion</li><li>- <b>insertConversationDocumentsMetadata</b> (boolean)     Include Conversation Data Source Metadata in Prompt</li><li>- <b>ragConversationDocuments</b> (boolean)     Include Conversation Documents in RAG</li><li>- <b>ragAttachedDocuments</b> (boolean)     Include Attached Documents in RAG</li></ul>	<p><b>200:</b> Assistant creation response.</p> <p>Content: application/json</p> <p><b>success</b> (boolean)</p> <p><b>message</b> (string)</p> <p><b>data</b> (object)</p>
Example Body	Example Response
<pre>{   "data": {     "name": "Sample Assistant 3",     "description": "This is a sample assistant for demonstration purposes",     "assistantId": "",     "tags": ["test"],     "instructions": "Respond to user queries about general knowledge topics",     "disclaimer": "This assistant's responses are for informational purposes only",     "dataSources": [{ 'id': 'e48759073324384kjsf', 'name': 'api_paths_summary.csv', 'type': 'text/csv', 'raw': '', 'data': '', 'key': 'yourEmail@vanderbilt.edu/date/w3ou009we3.json' },</pre>	<pre>{   "success": true,   "message": "Assistant created successfully",   "data": {     "assistantId": "astp/3io4u5ipy34jkelkdfweiorw ur",     "id": "ast/03uio3904583049859482",     "version": 1   } }</pre>

--	--

### Endpoint: {Base\_URL}/assistant/delete (POST)

Delete an Amplify assistant.

Expected Data	Responses
<b>assistantId</b> (string): Required.	<b>200:</b> Assistant deletion response. Content: application/json <b>success</b> (boolean) <b>message</b> (string)
Example Body	Example Response
<pre>{   "data": {     "assistantId": "astp/3209457834985793094"   } }</pre>	<pre>{   "success": true,   "message": "Assistant deleted successfully." }</pre>

### Endpoint: {Base\_URL}/assistant/create/codeinterpreter (POST)

Create a new Code Interpreter Assistant

Expected Data	Responses
<b>name</b> (string): Required. <b>description</b> (string): Required. <b>tags</b> (array of strings): Required. <b>instructions</b> (string): Required. <b>dataSources</b> (array of strings): Required - id (string): starts with your email (find these by doing a file query call)	<b>200:</b> Response for creating a code Interpreter assistant. Content: application/json <b>success</b> (boolean) <b>message</b> (boolean) <b>data</b> (object): - <b>assistantId</b> (string) - <b>provider</b> (string)
Example Body	Example Response
<pre>{   "data": {     "name": "Data Analysis Assistant",     "description": "An AI assistant"   } }</pre>	<pre>{   "success": true,   "message": "Assistant created successfully",   "data": {</pre>

<pre>specialized in data analysis and visualization",   "tags": ["data analysis"],   "instructions": "Analyze data files, perform statistical operations, and create visualizations as requested by the user",   "dataSources": ["yourEmail@vanderbilt.edu/2024-05- 08/0f20f0447b.json"]   "fileKeys": [],   "tools": [{"type": "code_interpreter"}]   } }</pre>	<pre>"assistantId": "yourEmail@vanderbilt.edu/ast/373849029843" } }</pre>
--	---

### Endpoint: {Base\_URL}/assistant/chat/codeinterpreter (POST)

Establishes a conversation with Code Interpreter, returning a unique thread identifier, that contains your ongoing conversation. Subsequent API calls can utilize this thread ID to append only your new messages to the existing conversation.

Expected Data	Responses
<b>assistantId</b> (string): Required <b>threadId</b> (string) <b>messages</b> (array of objects): Required <ul style="list-style-type: none"> <li>- <b>role</b> (string): Required, Options include: <ul style="list-style-type: none"> <li>- user</li> <li>- assistant</li> </ul> </li> <li>- <b>content</b> (string): Required</li> <li>- <b>dataSourceIds</b> (list of strings): Required <ul style="list-style-type: none"> <li>- id (string): starts with your email (find these by doing a file query call)</li> </ul> </li> </ul>	<b>200:</b> Returns the chat response from the Code Interpreter assistant. Content: application/json <ul style="list-style-type: none"> <li><b>success</b> (boolean)</li> <li><b>message</b> (string)</li> <li><b>data</b> (object): <ul style="list-style-type: none"> <li>- <b>data</b> (object): <ul style="list-style-type: none"> <li>- <b>threadId</b> (string)</li> <li>- <b>role</b> (string)</li> <li>- <b>textContent</b> (string)</li> </ul> </li> <li>- <b>content</b> (array of objects): <ul style="list-style-type: none"> <li>- <b>type</b> (string)</li> <li>- <b>values</b> (object): <ul style="list-style-type: none"> <li>- <b>file_key</b> (string)</li> <li>- <b>presigned_url</b> (string)</li> <li>- <b>file_key_low_res</b> (string)</li> <li>- <b>presigned_url_low_res</b> (string)</li> <li>- <b>file_size</b> (int)</li> </ul> </li> </ul> </li> </ul> </li> </ul>
Example Body	Example Response
<pre>{ "data": {   "assistantId": "yourEmail@vanderbilt.edu/ast/439290398",   "messages": [     { "role": "user",</pre>	<pre>{   "success": true,   "message": "Chat completed successfully",   "data": {</pre>

<pre>         "content" : "Can you tell me something about the data analytics and what you are able to do?",         "dataSourceIds" : ["yourEmail@vanderbilt.edu/2024-05- 08/0f20f0447b.json"]     }   ] } } </pre>	<pre> "threadId": "yourEmail@vanderbilt.edu/thr/442 309eb-0772-42d0-b6ef- 34e20ee2355e", "role": "assistant", "textContent": "I've saved the generated pie chart as a PNG file. You can download it using the link below:\n\n[Download Ice Cream Preferences Pie Chart](sandbox:/mnt/data/ice_crea m_preferences_pie_chart.png)\n", "content": [ { "type": "image/png", "values": { "file_key": "yourEmail@vanderbilt.edu/msg_P0 lpFUEY_pie_chart.png ", "presigned_url": "https://vu- amplify-assistants-dev-code- interpreter- files.s3.amazonaws.com/...", "file_size": 149878 } } ] } } </pre>
--	--

### Endpoint: {Base\_URL}/assistant/files/download/codeinterpreter (POST)

Download Code Interpreter generated files via pre-authenticated URL

Expected Data	Responses
<b>key</b> (string): Required. <b>fileName</b> (string): Not required, will automatically download if given the specific file name	<b>200:</b> File download for Code Interpreter. Content: application/json <b>success</b> (boolean) <b>downloadUrl</b> (boolean)
Example Body	Example Response
<pre> {   "data": {     "key": " </pre>	<pre> {   "success": true, </pre>

yourEmail@vanderbilt.edu/msg_P0lpFUEY_pie_chart.png "	"downloadUrl": "<Download URL>"
}	}
}	

### Endpoint: {Base\_URL}/assistant/openai/thread/delete (DELETE)

Delete a thread, deleting your existing conversation with code interpreter

Query Parameters	Responses
<b>threadId</b>	<b>200:</b> Content: application/json <b>success</b> (boolean) <b>message</b> (string)
Example URL Parameter	Example Response
?threadId=yourEmail@vanderbilt.edu/thr/8923420	{ "success": true, "message": "Thread deleted successfully" }

### Endpoint: {Base\_URL}/assistant/openai/delete (DELETE)

Delete a code inerpreter assistant instance

Query Parameters	Responses
<b>assistantId</b>	<b>200:</b> Content: application/json <b>success</b> (boolean) <b>message</b> (string)
Example URL Parameter	Example Response
?assistantId=yourEmail@vanderbilt.edu/ast/386233	{ "success": true, "message": "Assistant deleted successfully" }
